STUDENT'S WEEKLY RECORD OF INTERNSHIP

NAME OF STUDENT: DABHI SUMITBHAI BHUPATBHAI

DIARY OF THE WEEK: Dt: 02/01/2026 **TO** 09/01/2026

DEPARTMENT: COMPUTER ENGINEERING **SEM: 8**

NAME OF THE ORGANISATION: TECHNMAN CONSULTING

NAME OF THE PLANT/SECTION/DEPARTMENT: SOFTWARE DEVELOPMENT DEPARTMENT

NAME OF OFFICER INCHARGE OF THE PLANT/SECTION/DEPARTMENT: MOKSHA PATIDAR

DESCRIPTION OF THE WORK DONE IN BRIEF

1. Orientation & Project Briefing
   - Attended orientation with industry mentor Ms. Moksha Patidar. Received overview of project scope, 8-week plan and tech stack.

2. SDLC & Agile Methodology
   - Studied Software Development Life Cycle phases. Learned Agile – sprints, stand-ups, backlog grooming and iterative development.

3. Git & GitHub Fundamentals
   - Practised cloning, branching, committing, pull requests and merge workflows. Set up personal project repository on GitHub.

4. Python & OOP Revision
   - Revised Python data types, functions and OOP concepts: classes, inheritance and polymorphism using hands-on exercises.

5. ORM Concepts
   - Studied Object Relational Mapping (ORM) – mapping Python classes to database tables, querying with Django ORM syntax.

6. Development Environment Setup
   - Installed Python 3.11, pip, virtualenv, VS Code, PostgreSQL client. Configured ESLint, Prettier and Django extensions.

7. Git & GitHub Setup
   - Initialised personal project repository on GitHub. Practised cloning, branching, committing, pull requests and merge workflows.

DESCRIPTION OF THE WORK DONE IN BRIEF

1. Python File Handling & Exception Handling
   - Practised reading and writing files using open(), with statement. Studied try-except-finally blocks and custom exception handling.
2. Python Modules & Standard Library
   - Studied built-in modules: os, sys, datetime, json and collections. Created custom reusable utility modules for practice.
3. Python Virtual Environment & pip
   - Practised creating and managing virtualenv environments. Managed project dependencies using pip and requirements.txt file.
4. Python Database Connectivity
   - Studied psycopg2 for PostgreSQL and sqlite3 for SQLite connectivity. Practised executing queries and fetching results in Python.
5. Python Comprehensions & Iterators
   - Studied list comprehensions, dictionary comprehensions, generators and iterators for writing concise and efficient Python code.
6. Code Review & Documentation
   - Pushed Django practice code to GitHub. Documented learning notes and received mentor feedback on code quality.

NAME OF OFFICER INCHARGE OF THE PLANT/SECTION/DEPARTMENT: MOKSHA PATIDAR

DESCRIPTION OF THE WORK DONE IN BRIEF

1. Python Advanced OOP
   - Studied abstract classes, interfaces, static methods, class methods, dunder methods and operator overloading in Python.

2. Python Decorators & Context Managers
   - Learned function decorators, class decorators and context managers using the with statement for resource management.

3. Python – REST API Concepts
   - Studied HTTP methods (GET, POST, PUT, DELETE), status codes, JSON formatting and REST API design principles.

4. Python – JSON Handling
   - Practised parsing and serializing JSON using Python's json module. Built a mock API data handler using JSON files.

5. Python – Unit Testing
   - Studied Python unittest module. Wrote basic test cases for utility functions practised during the first two weeks.

6. Development Environment Setup
   - Installed Python 3.11, pip, virtualenv, VS Code, PostgreSQL client. Configured ESLint, Prettier and Django extensions.

7. Project Requirement Analysis
   - Studied Company Management System requirements with mentor. Identified modules: Employee, Department, Team, Project, Attendance, Work Progress and Reports.

DESCRIPTION OF THE WORK DONE IN BRIEF

1. Python – Pandas Deep Dive
   - Studied DataFrame operations: filtering, groupby, aggregation, merge and pivot tables. Practised data analysis on sample datasets.
2. Python – Excel with openpyxl
   - Studied openpyxl library for reading and writing Excel files. Practised creating formatted Excel reports from Pandas DataFrames.
3. Python – Regular Expressions
   - Studied Python re module for pattern matching, search, replace and validation. Applied regex for email and phone validation exercises.
4. Python – Multithreading Basics
   - Introduced to threading and multiprocessing modules. Studied concurrency concepts relevant to backend web development.
5. Python Revision & Practice
   - Revised all Python concepts covered across January. Solved combined exercises integrating OOP, file handling and Pandas together.
6. CMS Architecture Planning
   - Drafted system architecture for Company Management System: frontend,

DESCRIPTION OF THE WORK DONE IN BRIEF

1. Django Framework Introduction

- Installed Django, created first project and app. Studied project structure: settings.py, urls.py, views.py, models.py and admin.py.

2. Django ORM – Models & Migrations

- Defined models with CharField, IntegerField, EmailField, ForeignKey and DateField. Ran makemigrations and migrate commands.

3. Django Admin Panel

- Registered models in admin.py. Customised list_display, search_fields and list_filter for easier content management.

4. Django REST Framework – Serializers & APIView

- Installed DRF. Learned ModelSerializer, APIView and ViewSets. Built a simple Employee CRUD API to practice REST patterns.

5. JWT Authentication with SimpleJWT

- Integrated djangorestframework-simplejwt. Configured access token (30 min) and refresh token (7 days) settings.

6. RBAC – Custom Permission Classes

- Extended AbstractUser with a role field. Implemented custom DRF permission classes to restrict endpoints based on user role.

7. User Registration & Login API

- Built POST /api/auth/register/ with password hashing and POST /api/auth/login/ returning JWT access and refresh tokens with role payload.

DESCRIPTION OF THE WORK DONE IN BRIEF

1. React.js Project Setup

- Bootstrapped frontend with Create React App TypeScript template. Defined TypeScript interfaces for Employee, Department and ApiResponse.

2. React Router v6 Configuration

- Configured routes for LoginPage, AdminDashboard and EmployeeDashboard using React Router v6 with role-based navigation.

3. AuthContext & Protected Routes

- Built AuthContext using React Context API to manage global auth state. Implemented ProtectedRoute with role-based access guards.

4. Axios Instance & Interceptors

- Configured Axios with base URL and request interceptor to attach JWT Bearer token automatically to all outgoing API calls.

5. Login Page & Token Handling

- Built LoginPage with controlled form, Axios POST to /api/auth/login/, JWT token storage in memory and role-based redirect logic.

6. CORS Configuration

- Configured django-cors-headers in Django to allow cross-origin requests from React frontend development server.

7. Sprint Review – February

- Demonstrated Django backend APIs and React login flow to Ms. Moksha Patidar. Received approval to begin CMS project development in March.

DESCRIPTION OF THE WORK DONE IN BRIEF

1. React Component Architecture
   - Studied reusable component design, props, state lifting and component composition. Built reusable Table, Modal and Form components.
2. React Hooks – useEffect & useState
   - Practised useEffect for API calls on component mount and useState for managing form inputs, loading states and response data.
3. React Custom Hooks
   - Built useFetch and useForm custom hooks to abstract repeated Axios GET logic and form state management across pages.
4. Axios Response Interceptor
   - Added 401 Unauthorized response interceptor to automatically clear token and redirect user to login page on session expiry.
5. Employee List Page – Practice
   - Built a practice EmployeeListPage fetching data from Django API and rendering results in a paginated, searchable table.
6. Responsive Design Basics
   - Studied CSS Flexbox, Grid and media queries. Ensured practice pages render correctly across mobile, tablet and desktop screens.
7. February Revision & CMS Planning
   - Revised Django and React.js concepts. Finalised CMS database schema, module list and API endpoint plan before March development start.

DESCRIPTION OF THE WORK DONE IN BRIEF

1. CMS Database Schema Design

- Designed complete ER diagram for Employee, Department, Team, Project, Attendance, WorkProgress and User tables with all relationships.

2. Django Models – CMS Schema Implementation

- Implemented all CMS Django models with ForeignKey, OneToOneField, on_delete=CASCADE and appropriate field types. Verified migrations.

3. SQLite Configuration

- Confirmed SQLite as development database. Studied Django ORM relationship handling for ForeignKey and OneToOneField in CMS context.

4. API Endpoint Planning

- Documented all planned CMS API endpoints across Employee, Department, Team, Project, Attendance, WorkProgress and Reports modules.

5.React Project Structure Finalisation

- Finalised CMS React folder structure: pages, components, context, services and types. Set up base routing for all planned pages.

6. Technology Stack Confirmation

- Confirmed final tech stack: React.js frontend, Django REST Framework backend, SQLite database, SimpleJWT authentication and Pandas reporting.

7. Final Review & March Sprint Planning

- Presented complete CMS design to Ms. Moksha Patidar. Sprint plan for March–April CMS development approved and milestones confirmed.
